

Special Lecture

若者よ、海外を目指そう！

日時

2024年2月15日（木）

15:00～16:00

場所

医学部保健学科 第3講義室

Speaker

Dr. Mak Kwok Kei Ph.D CHES

(Designated Associate Professor)

Institute for Glyco-Core Research, Nagoya University

Title

**Advice for young researchers on studying
and working abroad**

Profile

Dr. Mak Kwok Kei is an epidemiologist specialized in applications of statistical and machine learning methods to examine the associations between physical activity and health. Dr. Mak obtained his degrees from University of London and University of Hong Kong, and health education specialist license from the United States. He has served at several universities in US, Korea, and Japan. He has also led two international student health studies and published over 50 publications in academic journals with more than 4500 citations. With his international experiences, he will provide valuable advice to young Japanese scholars with the aspirations to study and work overseas in this lecture and its Q&A session.
